Integrated Solutions for Plant Protection: Not only do we develop generic options but we also provide speciality formulations of world standards to match best quality parameters of the industry along with complete registration support with our toxicity and chemistry studies done in GLP accredited labs.

Registration: Providing the Active and formulated products alone would not be adequate enough for our demanding clients to bring our products to their markets, due to increasing stringent regulatory requirements, we know our clients expect much more from us to live up to their expectations we provide complete registration dossiers and regulatory support to have the product registered in each target market. To this effect we are able to offer close to 180 products with complete registration dossiers.

SYNTHESIS:
At Kenvos, we have also identified this business opportunity and working in tandem with some premier research institutions, we are able to develop generic products for our clients as well as have it produced for them.

QUALITY & PRICE: Getting a quality product at the right price is the key to success of every business. At Kenvos, we pay personalised attention to the specific needs of our customers. Once a requirement is sent to us, from there we take over and our customers can be at peace.

Our extensive sourcing network in Asia and our excellent relations with manufacturers of plant protection chemicals assures that our customers get what they need in terms of both quality and price. That's our goal "TO SUPPLY COMPETITIVELY WITHOUT COMPROMISING WITH QUALITY"

Quality: Since 1994, Kenvos has been found, delivering some of the world’s finest agrochemicals/pesticides to farmers or our customers. For us, quality means three very important things:
1. Certified pesticide preventing plants will be harvested in a good and sustainable manner.
2. A lovely, effective and consistent pesticide which exceeds customers expectations.
3. A product which is proven safe.

At KENVOS, we carry our high standards into the actual warehouse to guarantee our customers a high-quality product, KENVOS take pride in each and every product we offer you. We hope you enjoy firsthand, the quality found in all of our products and we will continue to work diligently to be your reliable pesticides in the future.

Logistics: No matter how good the quality of a product is, if the customer can't get the product in time, the whole exercise from beginning becomes futile. Ultimately, for the customers it's important to get the product as per their schedule and logistics in inventories. Shipments are planned and vessels booked from the day an order arrives us.

This is what we call an integrated solution
