Quality Control

Quality controlling system:

- Strict requirements factory to do raw materials into the factory and products testing.
 - Warehouse inspection Sampling.
 - National Certification Laboratory testing .
- Our company can send the sample to SGS for testing according to the customer's requirements. The purchasing department carries on the comprehensive supervision to the product quality control.

03 Multilingual and Localized Service

We have minor languages talents in our sales team, such as Cambodia, Spanish, Russian, Arabic and Bahasa Indonesia. Some of them are foreigners who can provide more genial localized services to our customers.

R&D and QC

Laboratory existing High Shearing Mixing Emulsor, sand mill, rotaing pressure granulator, twin-screw extrusion granulator, high-speed mechanical pulverizer, shock mixer, ultrasonic generator, electrothermal blowing dry box and other pesticide formulation processing experimental instruments. The analyzing and testing instruments include HPLC, GC, high speed tabletop centrifuge and so on.

Currently, the center is able to analyze and test over 100 different types of products and formulations including: Glyphosate, Abamectin, Imidacloprid, Acetamiprid, etc.. Quality controlling and product standards were drafted and established in accordance with the chemical standards stipulated by the Food and Agriculture Organization of the United Nations(FAO) and the World Health Organization(WHO).
